- TRANSPORTATION
- EV CHARGING STATIONS

Border Business Park is located within Leduc County, a key industrial hub supporting distribution growth in the Edmonton region. The Mill rate in Leduc County is significantly lower than the City of Edmonton, with the County approximately 62% below the City in 2026. The forecasted tax differential between a proposed 500,000 square foot building in the City versus Leduc County is approximately \$2.36 per square foot per year over a 10-year lease term which equates to \$11.8 million in total tax savings over a 10-year term or \$1,180,000 per year, for businesses operating within the County.

In the immediate term, the tax differential is approximately \$2.11 per square foot, equating to approximately \$1,054,644 in annual savings.

It's no surprise that major international companies like Amazon, along with thriving local businesses, have chosen to establish their operations here.

Developed by Hopewell Development, a trusted name in commercial real estate for nearly 30 years, Border Business Park exemplifies quality and innovation. Businesses across all industries rely on Hopewell for intelligent, tailored real estate solutions—making them one of North America's leading commercial developers.

Multiple demising options available:
115,000 SF | 135,000 SF | 154,000 SF

BUILDING M IS DESIGNED TO BE LEED® GOLD Construction

As one of Canada’s largest and most dynamic commercial developers, Hopewell is committed to conducting our business activities in an environmentally conscious manner.

Hopewell’s Building M, pursuing LEED® Gold Certification, provides energy savings and environmental benefits.

As a LEED® GOLD certified building, Building M will use fewer resources, reduce waste and CO2 emissions, and maximize the health and productivity of tenants and occupants. The building’s reduced utility consumption will also result in substantial reductions in energy, water and maintenance costs, while addressing climate change, enhancing resilience, and supporting stewardship of valuable resources.

- Installation of Photovoltaics (PV) to produce affordable, sustainable energy with a combined production of 740,000 MW (megawatt) per year, the equivalent of approximately 1,300 solar panels
- Intelimeter advanced energy metering system with energy analysis software
- Electrical vehicle (EV) charging stations (2% of total parking stalls = 6 EV charging stations)
- Cambridge rooftop high-efficiency = heaters
- Use of building materials and furnishings such as paints, sealants, adhesives, and carpeting with low levels of VOCs (volatile organic compounds) and formaldehyde
- Green cleaning to reduce harmful chemical, biological, and particulate contaminant

LEED® Gold certification, combined with the installation of a solar array, makes sustainability effortless at Border Business Park.
